

HW2: Engineering Lecture Hall

Nathaniel Jordan, 68401316

UCI Engineering Lecture Hall (301)

- Building for our 81A lectures!
- Contains a large lecturing hall, several storage closets, and two gendered bathrooms
- Contains lush ivy vines on many of the pillars
- The elevation of the building is tricky: the doors lead to downward staircases in the lecture hall, and at the bottom is the lecture podium. From the back of the building is an alternative entrance, accessed through the lower engineering center
- Dimensions of the layout are pictured below:

Note: Made with Sketchup 2017 (no access to 3D warehouse)
